

10591844

In the specification:

Page 1, line 2, amend as follows:

~~Prior Art~~ CROSS-REFERENCE TO A RELATED APPLICATION

The invention described and claimed hereinbelow is also described in German Patent Application DE 10 2004 017716.3 filed on April 10, 2004. This German Patent Application, subject matter of which is incorporated herein by reference, provides the basis for a claim of priority of invention under 35 U.S.C. 119(a)-(d).

BACKGROUND OF THE INVENTION

Page 1, line 24, amend as follows:

~~Advantages of the Invention~~ Summary of the Invention

Amend the paragraph bridging pages ~~1 and 2~~ as follows:

✓✓  
10.5.09

materials for the contact face and the clamping face that have different coefficients of thermal expansion can be used, and self-centering of the magnet is assured by the radial location of the fluting.

Page 2, amend the paragraph in lines <sup>15 21</sup>~~8-15~~ as follows:

Δ<Δ  
10.509

~~By the provisions recited in the dependent claims, advantageous refinements of and improvements to the characteristics recited in claim 1 are obtained.~~ If the radial knurling has raised areas which extend in the radial direction and which in the axial direction are tapered to a point in wedgelike fashion, the raised areas, under the influence of the axial clamping force, can easily dig into the contact faces of the magnet, or of its surface coating, and as a result can form a form lock with regard to the tangential direction (direction of rotation).

Page <sup>6</sup>~~5~~, line <sup>5</sup>~~12~~, delete the heading "Drawings" in its entirety.

Page <sup>4</sup>~~5~~, between lines <sup>5</sup>~~14~~ and ~~15~~, insert the following heading:

BRIEF DESCRIPTION OF THE DRAWINGS

Page <sup>6</sup>~~5~~, line <sup>23</sup>~~22~~, amend as follows:
